Hand Building

Series: Ceramics for beginners
Lark Books

NEW
SERIES

Ceramics are always popular with crafters, and hand building with low-fire earthenware is a natural place to start. With its wealth of information and images, elegant design and time-tested advice this beautiful new book by artist Shay Amber will inspire even the most intimidated beginner. Just as in her celebrated workshops, Amber guides would-be ceramists through all the basics, from selecting the right clay body to embellishing the surface with fabulous decorations and gorgeous glaze treatments to setting a firing temperature. Each technique is laid out in easy-to-follow step-by-step photos with projects in progress and stunning gallery images. Amber introduces a unique, easy-to-follow method for constructing a beautiful slab-built piece, and all the necessary templates are included. A dozen projects—including a pinched Tea Bowl, coil-built Espresso Cup Set, and Luminous Lantern showcase the key methods. Comprehensive and accessible, this illustrated introduction will become the standard on the potter's bookshelf.

The Indian and Pacific Correspondence of Sir Joseph Banks, 1768–1820

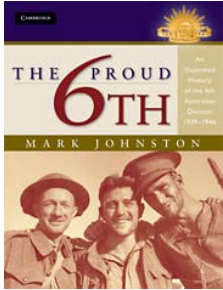

Volume 1 of a 6 volume set
Frequency: annual
Pickering and Chatto

Following his participation in James Cook's circumnavigation in HMS *Endeavour* (1768–71), Joseph Banks developed an extensive global network of scientists and explorers. His correspondence shows how he developed effective working links with the British Admiralty and with the generation of naval officers who sailed after Cook. He was familiar with most natural philosophers in Britain and across Europe, many of whom consulted his unrivalled collections of Pacific natural history and ethnology, and who shared specimens and information with him regarding the region. Banks also advised the British government and commercial enterprise in the development of successive ventures to India, the Far East and the Pacific. His career demonstrates how a private individual could influence global exploration in the Georgian era.

The Proud 6th: An Illustrated History of the 6th Australian Division 1939–1946

Series: Australian Army History
Frequency: multi issues
Cambridge University Press

Following Mark Johnston's acclaimed illustrated histories of the 7th and 9th Australian Divisions, this is his long-awaited history of the 6th Australian Division: the first such history ever published. The 6th was a household name during World War II. It was the first division raised in the Second Australian Imperial Force, the first division to go overseas and the first to fight. Its success in that fight, in Libya in 1941, indicated that the standard established in the Great War would be continued. General Blamey and nearly every other officer who became wartime army, corps and divisional commanders were once members of the 6th Division. Through photographs and an authoritative text, this book tells their story and the story of the proud, independent and tough troops they commanded.

The Cambridge History of Science

Volume 6 of an 8 volume set
Frequency: published out of sequence
Cambridge University Press

The Cambridge History of Science is to be published in eight substantial volumes, beginning with Ancient Mesopotamia and classical Greece and Rome, through the Medieval period, early modern Europe, and on through modern science. The history begins chronologically and that approach continues on up to Volume 4, after which the volumes split off into modern histories of different branches of science. They are designed to be read as both a narrative and an interpretation, and also used as a work of reference. The first comprehensive history of science in 30 years, they will be an excellent reference for historians and professionals in the history of science. The contributors, world leaders in their respective specialties, engage with current historiographical and methodological controversies and strike out on positions of their own.

Volumes 3, 4, 5 and 7 are also available at the special price of \$199.00 when you order through the Standing Orders Department

The Human Rights Enterprise in Australia

First Edition
LexisNexis

9780409308617
December 2008
PB \$120.00

This book provides a wide-ranging analysis and critique of Australian law firmly rooted in the context of the broader international dimension. Drawing primarily on international law to identify the standards embodied in human rights, the author turns to domestic law to consider how those rights can be implemented, in practice, in Australia's own unique legal system. Many suggestions for changes in the law are made, including adoption of the rule of law as a constitutional implication.

- Roach v Electoral Commissioner and sequel 2007
- Haneef, Hamdan and Boumediene cases (US) and Thomas (Aust)
- Changes to refugee law migration act post-Howard
- Australian Bill of Rights Initiative
- ACT and Victorian Human Rights Acts
- The Civil Union Act 2008 (Vic) and Civil Partnerships Act (ACT) 2008
- The Sorry Statement
- Counter-terrorism law critique
- Recent Rudd government announcements, eg same sex, TPVs, support for indigenous declaration of rights

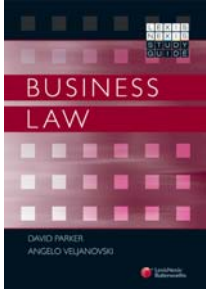

Important Features

- Provides an Australian perspective that is firmly rooted in the international context
- Broad coverage with detailed analysis of a wide-range of material
- Key areas of controversy and debate are highlighted throughout the book to encourage critical thinking and class discussion

In *Wagner and Venice*, John Barker examines the connections between the great composer and the great city. The author traces patterns of Wagner's visits to Venice during his lifetime, considers what the city came to mean to Wagner, and investigates the details surrounding his death. Barker also examines how Venice viewed Wagner, by analyzing the landmark presentation of Wagner's Ring Cycle two months after the composer's death and by considering Venice's subsequent extensive Wagner celebrations and commemorations.

Your Genre in Black—Indigenous Performing Arts and Policy

Series: Platform Papers
Frequency: multi issues
Currency House

Indigenous performing arts have developed enormously since the early movement in 1970 and now face a dilemma between fulfilling community responsibilities and the new generation of professionally-trained artists achieving the artistic autonomy which they are now demanding. Government funding for Indigenous work has to date been couched in terms of its contribution to employment, health and social good. Artists are now calling for an end to sympathetic indulgence of less-than-the-best in favour of a place in the national and international arena. The authors examine these tensions and outline the hurdles yet to be overcome before a new cultural policy will be established that not only recognizes talent but promotes it.

Kodansha Encyclopedia of Japan

Palgrave

Over the past two decades, Japan's power to affect the rest of our planet has grown at an astonishing rate. The global reach of Japanese industry, finance and technology has been felt in almost every country. Yet Japan remains an enigma to most people, in part because the country has faced more formidable barriers to the export of its cultural, artistic and intellectual accomplishments than it has to the products of its industries. Today, the volume of information on Japan that reaches other countries is small in comparison to need. This encyclopedia is an attempt to redress this imbalance.

It is:

- a fully updated online resource that will give you a key to unlocking the complex society of modern Japan
- a wealth of hard data on Japanese politics, government, economics and corporate behavior
- a treasury of Japanese art, culture, and history
- a guide to the more subtle traditions that have shaped Japanese life and thought throughout the centuries
