With the Professional Computing and Web Design eBook Collection, Springer provides works that enable programmers and developers to excel at every step of their academic and professional careers. Over 150 new titles are planned for 2007 and there is an active set of recent backlist titles on a variety of technologies.

Springer is committed to providing programmers and developers with the information they need to solve the problems they encounter in their working lives. To do this, we have built—and continue to build—the most comprehensive line of eBooks in the industry, for programmers using Microsoft-related technology. Our open source line helps developers utilize the tools within the marketplace and corporate world to save time, money, and frustration. We have an extensive selection of titles dedicated to Java technology, and our Web Development line offers in-depth guides for the Web and wireless solutions.

This collection features distinctive technology roadmaps that guide readers through the beginning, professional, and expert series. The roadmaps offer the shortest distance between ignorance and mastery on a subject.
