

International Congress Calendar

Ed.: Union of International Associations

**New:
Now available
from K. G. Saur**

The *International Congress Calendar* is the most comprehensive source of information on past and future international meetings organized or sponsored by international organizations. Over 15,000 are included every year. All information is provided, or confirmed, by the organizations themselves.

Now available online: Instead of the up-to-now quarterly printed version, this information is now available online, under subscription.

The database contains details of past and future meetings announced by international organizations profiled in the *Yearbook of International Organizations*.

The database offers you:

- Meeting names
- Date range
- Location
- Organizer names (including links to their profiles in *Yearbook Online*, when you have subscribed to this database), with contact details
- Participant numbers and associated exhibition (where available)

The online edition offers features and advantages as, for example, powerful and user-friendly navigation; current, dynamically generated statistics; graphics and maps, direct e-mailing to the organizations with the help of browser technology, and updating intervals of at least once a month.

This is the ultimate supplement to the *Yearbook of International Organizations* and an indispensable resource for information about international conferences and meetings!
