

YEARBOOK OF INTERNATIONAL ORGANIZATIONS

Guide to global civil society networks

As the largest and most comprehensive reference work on intergovernmental (IGO) and international non-governmental organizations (INGOs) of all types, the **Yearbook of International Organizations** has become an institution in and of itself.

The Yearbook offers detailed, factual information on organizations around the world, ranging from the United Nations, ASEAN and the Red Cross, to professional associations, scholarly societies, sports clubs and religious orders. All elements of transnational civil society are covered in its contents.

The information has been compiled and refined over many years by the *Union of International Associations (UIA)*, the most significant institution in this field. In addition to historical and structural details (such as aims, specialization and geographical presence) the Yearbook also provides current information about contact addresses, fields of activity, events, publications, and biographical information on executive officers.

Careful preparation and practically structured indexes make all the information easily accessible. Further, numerous cross-references illustrate connections between organizations.

Thus, the **Yearbook of International Organizations** is an essential compendium for those concerned with international relations and transnational civil society.

It is available in printed and CD-ROM editions or as an online version with extended data, numerous search functions and access to other UIA databases - ideal for all those in contact with and concerned with international organizations as part of their every day work.
